

SERVICE DESCRIPTION

Kong Insomnia

Last updated: March 31, 2023

The following is an overview of the Kong Insomnia offering which is subject to change.

Kong's products and offerings are subject to constant evolution and Kong reserves the right to change them and this service description at any time in its sole discretion.

Kong Insomnia Summary

Insomnia is a collaborative API client and design tool which allows customers and developers to build and test APIs quickly.

Insomnia is an open source software product which is offered for free or, together with a limited SaaS service, for a monthly per user fee, on a credit card touchless sales model. Insomnia is also offered to enterprise customers.

Kong Insomnia Features and Functionality

Insomnia allows users to organize requests to reflect your workflow or your API data-model, and group and order API requests.

Users can manage multiple environments, and define environment variables like authentication credentials, tokens, or session IDs for re-use globally or within a public / private environment for a seamless development / production workflow.

Insomnia can provide developers with generated code snippets in popular languages like Curl, NodeJS, Go, Swift, Python, Java, C, and more.

Insomnia Subscriptions

Kong offers access to Insomnia Teams on a month-to-month subscription, on a per-user basis. Insomnia Teams is purely a service, offering the ability to store or share API configurations among team members. These services are subject to [online terms and conditions](#).

Kong also offers Insomnia Enterprise, with Kong support and response time SLAs, through Kong's sales organization. Please contact your Kong sales representative for more information.
